

20 July 2017

William MB Edmands (12.04.1983–30.06.2017)

The International Agency for Research on Cancer (IARC) is saddened by the passing of Dr Will Edmands, a former IARC student who died recently.

Will spent two years working at IARC in the Biomarkers Group (2012-14) as a post-doctoral scientist. He played an important role in introducing the new field of metabolomics to the Agency and showed unique talent and great commitment in developing innovative bioinformatic workflows to analyze the complex metabolomic data generated. His work was published in leading scientific journals and has been widely cited since publication. Will was a warm, enthusiastic and generous colleague who will be greatly missed professionally and personally by all at the Agency.

Our deepest sympathy is with Will's family and friends.
