

IARC Handbooks of Cancer Prevention - Call for Data

Volume 15: Breast cancer screening

Lyon, France

11–18 November 2014

CALL FOR DATA

Closing date: 15 October 2014

IARC is interested in locating studies that are relevant to the cancer-preventive potential of the agents that will be reviewed in this volume. Eligible studies should be published or accepted for publication in the openly available scientific literature.

IARC is especially interested in finding (a) studies that are recently published or accepted for publication, and (b) studies that are not easily found through standard literature searches. This includes studies published in languages other than English.

To allow adequate time for the Working Group that will develop this volume to consider all studies, please send your list of references as soon as possible and before the closing date. In exceptional cases, the Working Group may elect to consider studies that become available after the closing date. Please send your list of references by e-mail (handbook15@iarc.fr) or fax (+33-4-72.73.83.19).

Pertinent studies will be made available to the Working Group, and no material will be treated as confidential. IARC will contact you if assistance is needed in retrieving a study.

Thank you for your interest in the *IARC Handbooks of Cancer Prevention*

Béatrice Lauby-Secretan, Responsible Officer for *IARC Handbook Volume 15*

Kurt Straif, Head of the *IARC Monographs* programme
